CTP Service & Repair

Calkins Technical Products, Inc. (CTP) has opened a state of the art service and repair division to help meet the needs of existing customers and to offer more services to new facilities.

Our service department is capable of repairing all types of pumps, mixers, gear-boxes and mechanical seals. From removal from your facility to reinstallation af-

ter the repair and all points in between, we are providing the highest quality job available.

We have Failure Inspection Reports available that provide a document with images for you to thoroughly see what our skilled mechanics find as they tear down your piece of equipment.

Calkins Technical Products, Inc. has been providing high reliability upgrades for years, installed by the customer. We now have the ability to do those installations for you, in our shop or at your site.

If there is a machining, polishing or welding need, we are well equipped for that too.

In our shop we can pressure test many types of pumps and mechanical seals to insure proper reassembly before we crate and ship or deliver that equipment back to you.

In a nut shell, **CTP Service & Repair** shop will...

- Clean, tear down & inspect equipment
- Provide to you a detailed inspection report with findings
- Quote labor & parts for complete repair
- Advise of reliability upgrades
- Repair & re-assemble equipment
- Pressure test for flange rating for 20 min.
- Prepare for shipment

CTP Service & Repair also offers...

- Pick-up & delivery
- On site repair service
- Documentation with images
- Sandblasting & painting

So, for high quality service and repair for your rotating equipment needs, call the friendly customer service pros at **Calkins Technical Products Service & Repair** today!
